An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for April is 5.1 percent, six-tenths of a percentage point below the national rate of 5.7 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during April 2002 was 2,967,800.

Indiana's April unemployment rate was lower than Illinois, 6.1 percent; Michigan, 5.9 percent; and Ohio at 5.4 percent. Kentucky and Indiana both had a rate of 5.1 percent.

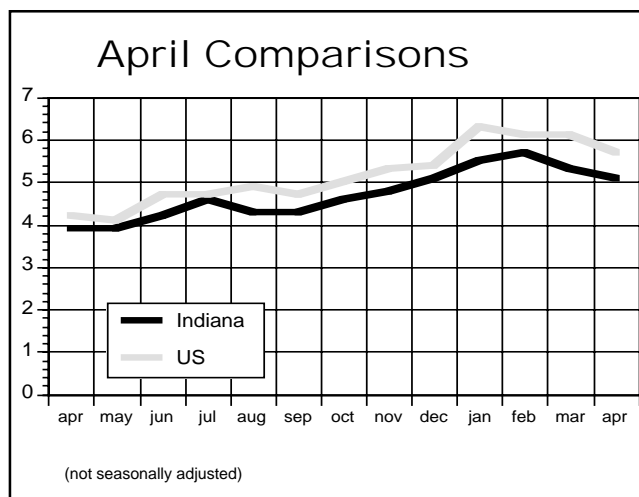

"Seasonal factors have contributed to a decline in Indiana's unemployment rate. DWD continues to focus its efforts on those Hoosiers who are out of work due to the lingering effects of the recession," commented Hartzer.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,905,900, a decrease of 47,700 from one year ago and 16,300 more than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 617,500 in April, a decrease of 32,300 from last year. Motor vehicle manufacturing accounts for 90,900 jobs, 2,400 less than one year ago. Manufacturing of motor vehicle parts totals 60,000. Industrial machinery manufacturing in April accounts for 64,100 Hoosier jobs, 200 less than March.

Construction employment totals 135,200 an increase of 4,500 from last month. Of that, heavy construction reports 15,700 jobs, a decrease of 800 from last year.

Service producing employment totals 2,146,200 in April, 6,400 less than last year. Transportation and public utilities total 142,300, 500 more than March.

(over)

Retail trade totals 546,200, 4,100 less than a year ago. Of that, general merchandise stores report employment of 78,400, or 1,500 less than last year. Service sector employment, such as business services, computer and data processing, totals 754,200 in April, which is 100 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,127,100 in April 2002. An estimated 2,967,800 Hoosiers are employed and 159,300 are unemployed.

Indiana's labor force for April 2001 totaled 3,097,800. Hoosiers employed one year ago is estimated at 2,976,500, and April 2001 unemployed in Indiana totaled 121,300. Indiana's estimated unemployment rate one year ago was 3.9 percent, compared with the national unemployment rate of 4.2 percent in April 2001.*

*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.
